

MOBILITY COMBAT SYSTEMS OFFICER (CSO)

Air Mobility Operations Squadron (AMOS)

AFSC: 12M3S

Combat Systems Officers (CSO), formerly known as Navigators, bring a unique skill set to the Air Mobility Operations Squadron (AMOS). Training to a position in the Air Operation Center (AOC) allows a CSO to take their tactical flying experience and translate it to the operational level of war fighting.

MAJOR TASKS

- CSO duties include all aspects of mission planning and execution needed to move a "requirement" (cargo or personnel) from one location to another
- One of the planning goals, as a member of the ALCT, is to have all airlift and airdrop missions accurately represented in the Air Tasking Order (ATO)
- In the AMCT execution role, the CSO may act as the Air Mobility Division's representative on the AOC floor. AMCT members monitor inter-theater (TACC) missions while performing Command and Control (C2) duties for the intra-theater missions which operate in a defined Area Of Operations (AOR)

REQUIREMENTS

- Bachelor's Degree
- Commission as an officer in the Air Force Reserve
- Physical Qualification for Flying Class I
- Current aeronautical rating and qualification for aviation service as an USAF pilot
- Eligibility for a Top Secret security clearance
- Minimum of three (3) years operational experience in the USAF/USN as a Mobility Pilot
